

DEAR VISITOR

In Chile, the main objective of national parks is to protect the natural environments and evolutionary processes that occur inside them, in addition to conserving their cultural and scenic heritage. Therefore, we only authorize activities of education, research or recreation compatible with our conservation objective (Law 18,362).

The regulations detailed below are inspired by the protection of the resources of this park and the precautions you must consider to make your visit a safe one. The climatic conditions of Patagonia are variable and unpredictable, so any carelessness can be fatal.

Help us preserve our natural heritage!

CONAF
Torres del Paine National Park

RESTRICTED ACTIVITIES

Conaf allows the realization of low impact recreation activities and with certain rules. Failure to comply with these rules implies **immediate expulsion from the park.**

- Use of fire**
The use of any heat source within the park is prohibited by Law 20,653. The offenders will be made available to Carabineros de Chile. Failure to comply with this rule may be punishable by fines of up to \$ 2,000,000 or up to three years in prison.
- Camping**
It is allowed exclusively in the authorized areas indicated in this map. It is strictly forbidden to stay overnight in any other place.
- Cook**
Allowed only to use stoves that do not use vegetable material as fuel (BioLite type), in the specially enabled areas of each camp or camping area. **In any other place it is prohibited and sanctioned by Law 20,653.**

Observation of wildlife and photographic safaris
It is only allowed during daylight and within the official trails marked on this map. All activity outside the trails is prohibited, as contact between humans and wildlife causes changes in the behavior of some species, generating risks for both people and animals.

Cycling
Although it is authorized on vehicular roads, it is not allowed to cycle on the W and Macizo Paine circuits; consult park rangers about authorized routes. For safety, always go accompanied, because there is a risk of puma attack.

Horseback riding
Only if using the services of companies authorized by CONAF and on the authorized trails indicated in this map.

Fishing
It is only authorized in the Serrano river and Toro lake, catch-releasing and fulfilling the requirements of Law nr. 20,256 (fishing license, fishing season, type of gear, etc.) Considering that the presence of the Didymo seaweed has already been evidenced in the limits of the Park, it is mandatory to disinfect all the gear and equipment used by the fisherman, which must be done in the lodges and in the presence of a park ranger. Please help us avoid the spread of these algae as it is a declared pest!

Sailing
Only under conditions established in special permits that must be processed in the Administrative Headquarters of Torres del Paine National Park. In addition, all boats (kayak, inflatable boats, etc.) and associated equipment that enter the park must present a disinfection certificate issued by independent companies operating in Puerto Natales. This document will be valid for 48 hours and will be retained at the entrances.

Operation of drones or radio-controlled devices
Its use is prohibited because they disturb the fauna. If you are caught using one, you will be expelled from the park and a report will be issued to the General Directorate of Civil Aviation.

No Smoking
All the forest fires that have affected the park have been caused by human

- Climbing**
Only under conditions established in special permits that must be processed in the Administrative Headquarters of Torres del Paine National Park.
- Swimming**
Due to the high risk of asphyxiation by immersion, it is prohibited in all water bodies of the park: lakes, lagoons and rivers.
- Filming**
As in all units of the National System of Wild Protected Areas of the State (SNASPE), the park is available for the capture of images (video, film, photographs). Excluded from formal processing and authorization are those whose purpose is for domestic use, press activities (graphics and television) and which are carried out in sectors of public use in the park. **Those involving assembly, major logistics deployment and/or projects for profit, advertising or commercial purposes, will be subject to charges and prior authorization processing.**
- Pets**
Pets are not allowed, since in addition to disturbing wildlife, they can transmit and spread diseases. In turn, pets can also contract diseases of wildlife.

Consult park rangers before doing any activity that is not described in this bookleta.

BEHAVIOR IN THE TRAILS

Trails go across the habitat of many species. Pass through them silently to enjoy the sounds of nature. **It is not allowed to play music with speakers or run.** If you suffer from vertigo, consider that between the Gray and Paso camps there are two hanging bridges with a height greater than 20 meters.

It is forbidden to walk the trails with no daylight
Walking in darkness is dangerous because you risk getting lost, falling or being attacked by a puma. The fauna presents greater activity at night and the human transit and the use of lanterns alter its behavior.

Walk exclusively on authorized trails
Walking outside demarcated routes causes erosion and irreparable damage, so it is forbidden to walk off the trails.

Wildlife Sighting
If you are near an animal, do not approach it because your presence will disturb it and can damage it. Do not touch it and never feed it. Always keep children close to an adult. Help the natural to remain wild.

Encounter with pumas/cougars
If you encounter a puma, stay calm. Do not approach it or run. Try to back away slowly making eye contact. Stay upright and if the animal still approaches you, attempt to appear larger by raising your arms and opening your jacket if you are wearing one. Wave your arms slowly and speak firmly in a loud voice. If you have small children with you, pick them up if possible so they don't panic and run. Although it may be awkward, pick them up without bending over or turning away from the animal. A cougar that is eating or accompanied by their offspring can be dangerous, so it should not be disturbed or interfered with their natural behavior.

IMPORTANT INFORMATION

- Garbage:** You must take all the garbage generated during your visit. Leaving garbage in the park is sanctioned by law 21,123. Do not risk fines.
- Mice:** You may find small mice in camps or camping areas. Although to date there is no evidence that they carry dangerous diseases such as the Hanta virus, we recommend that you always keep your tent tightly closed and store your food in hermetic containers keeping it hanging to avoid gnawing of your equipment or food. All the species present in the park are native and, therefore, protected since they play an important role in the balance of the ecosystem.
- Cell Phone Coverage:** There is no cell phone signal inside the park. In case of emergency, contact a park ranger, guide or tour operator with radio equipment (frequency 143,800 Mhz). If you have a satellite phone, you can call the Administrative Headquarters of the park +56612360496 or Carabineros de Chile + 56612761139.

STOP
WILDFIRES

IT'S UP TO YOU TO PREVENT THEM

Lighting fire and using heat sources in unauthorized places within wild protected areas carries a penalty of up to 3 years imprisonment and a fine of up to \$3.000 USD.

IF YOU	YOU MUST
USE HEATING SOURCES OR COOKING STOVES	DO IT ONLY IN PROPERLY DESIGNED AND SIGNALIZED AREAS.
- Use a cooking stove	Make sure it's on a stable surface and protected from the wind.
- Smoke	Do it's only in authorized places, never on trails!
SEE SMOKE, A FIRE OR ANY INAPPROPRIATE USE OF FIRE	NOTIFY THE CLOSEST PARK RANGER OR CALL THE 130 EMERGENCY NUMBER

CAUTION! Patagonian strong winds can trigger megafires.

SAFETY TIPS FOR HIKERS

- Water can be consumed from the park's water courses. Always collect it upstream of the trails and as far as possible from the camps.
- The schedules established for the closing of the trails aim at preventing the night from surprising the visitors before reaching the next camp. Only the park ranger of each sector can authorize walking after hours and for exceptional situations.
- In case of heavy rains or thaws, the rivers grow and can be dangerous, both because of their torrent and because of their low temperatures. Do not attempt to cross if the water exceeds the height of your knees and avoid walking alone. Always consult the park ranger about the condition of the trails.
- Leaving the hiking trails is very dangerous. Almost all fatal accidents in the park occur outside of authorized routes.
- The climate in Patagonia changes rapidly. Wear layers of appropriate clothing to withstand rain, wind and/or snow. Overestimating your abilities or underestimating nature can be dangerous.
- Registration is mandatory upon arrival at all ranger stations. In the Paso and Perros camps, in addition, you must register your exit for your own safety.
